

Year 6

Animals, including humans

We are learning about:

- **blood and how it circulates in your body** (identify and name the main parts of the human circulatory system, and describe the functions of the heart, blood vessels and blood)
- **how lifestyle choices can affect your health** (recognise the impact of diet, exercise, drugs and lifestyle on the way their bodies function)
- **the importance of nutrients and water** (describe the ways in which nutrients and water are transported within animals, including humans)

We are learning to:

- **plan a pattern seeking enquiry** (to be able to plan pattern-seeking enquiry independently)
- **record my results** (be able to record results using a line graph)
- **report on what I find out** (be able to present findings and report causal relationships from enquiries)
